

Student Survey Questions – sample

The Office of the Provost at the University of Alberta has established the Provost Digital Learning Committee (PDLC) to support the implementation of digital learning activities across the university. One of these initiatives has been the implementation of blended learning components in some courses. Blended learning is an instructional approach where there is a fusion between traditional face-to-face instructional time and online learning. The purpose of this survey is to evaluate courses that have implemented some blended learning components and to understand student satisfaction and experience in blended learning courses. Participation in this survey is completely voluntary and your responses will remain anonymous. By clicking next, you are agreeing to include your responses in the study.
