

North American Energy Dialogue

SEMINAR 3

How Biden's Energy/Environmental Policy could impact US-Mexico-Canada energy trade?

Thursday, February 11, 2021 (11:30 - 1:00 PM CST)

How would the U.S. and Canada react to a possible reversal of Mexico's constitutional energy reform and its anticipated impact on U.S. and Canadian energy investments? Do Canada, and to a lesser extent, Mexico have potential to provide significant future supplies of renewable electricity to U.S. markets, which could help the United States meet environmental policy objectives?

This discussion will attempt to outline the key issues and analyze the possibilities as Biden's energy policy unfolds.

Featuring

MODERATOR

RACHEL MCCORMICK
Consul General of
Canada in Dallas,
United States

PANELIST

DR. SERGIO M. ALCOCER
Researcher, Engineering
Institute of the National
Autonomous University of
Mexico

PANELIST

BEN CAHILL
Senior Fellow, Energy
Security and Climate
Change Program,
CSIS

PANELIST

AINDRIÚ C. COLGAN
Tax and Trade Policy
Manager, American
Petroleum Institute

PANELIST

DR. ANDREW LEACH
Associate Professor,
Alberta School of Business
