

South Campus Consultation Group  
Wednesday, December 2, 2020  
7:00pm to 8:30pm  
Via Zoom

## FINAL

University of Alberta (UA): Anastasia Lim, Emily Ball, Mike Kohlenberg, Ben Louie

Community members: Stephen Dobson (Lendrum), Paul Greenwood (Lansdowne), Bernie Schwartz (Lansdowne), Peggy Dodson (Malmo), Ed Hudson (Parkallen), Cam Brown (Grandview Heights).

Commenced: 7:00pm

1. **Introductions** - A. Lim asked everyone at the meeting to introduce themselves.
2. **Review and approval of Record of Discussion from June 16, 2020** – E. Hudson asked the minutes of the June 16 2020 reflect the following change of text: “UA to consider placing benches on the south side of the storm water management pond to complement the existing benches on the northwest side.”
3. **Update on priority projects**
  - a. **South Campus Community Ice Arena** – M. Kohlenberg informed the group that the UA has indicated to the City of Edmonton that the project has been paused/put on hold. The UA has many issues that it is dealing with and this project is not a priority at this time. M. Kohlenberg added that the UA will keep the design and if an opportunity/funding should present itself the project will be revisited.
  - b. **Michener Park (MP) Edmonton Police Services (EPS) and Edmonton Fire and Rescue Services (EFRS) training** – E. Ball provided the group with a summary of recent discussions with EPS and EFRS regarding the opportunity to conduct training on the MP site. She outlined the communication process that has taken place to date, which included attending an in person meeting with the Malmo Community League Executive with a member of EPS, flyer distribution and ongoing communication plans with Malmo.
  - c. **Saville Community Sports Centre parking update** – A. Lim informed the group that a test pilot project was conducted for the new proposed parking fee system. She told the group that there have been no issues related to the pilot project but that unfortunately it took place during the beginning of the pandemic and there is virtually no data to draw from in that only 15 cars have parked under the new system. S. Dobson indicated that he had not noticed any impact and C. Brown added that there is no spill over into Grandview but he did notice all parking lots located near the Savile Community Sports Centre are empty. C. Brown added that given the current pandemic any parking on the site would not represent what usually happens there. S. Dobson added that it would have been interesting to see such a pilot 2-3 years ago and that he feels it would be 1-2 years before “back to normal” parking will appear. A. Lim added that she agreed that it will take time before a representative reading of parking can take place.
  - d. **Other** – S. Dobson asked if there was an update on what is happening with planning for the MP site with the UAPTI. E. Ball told the group that she would ask T. Werre to email the SCNC with an update. S. Dobson and the group had a brief discussion regarding a local school trustee who asked to attend the SCCG meeting.
4. **Adjournment/Next steps** – The meeting was adjourned at 7:25 pm.
