

# LAB PLASTIC RECYCLING

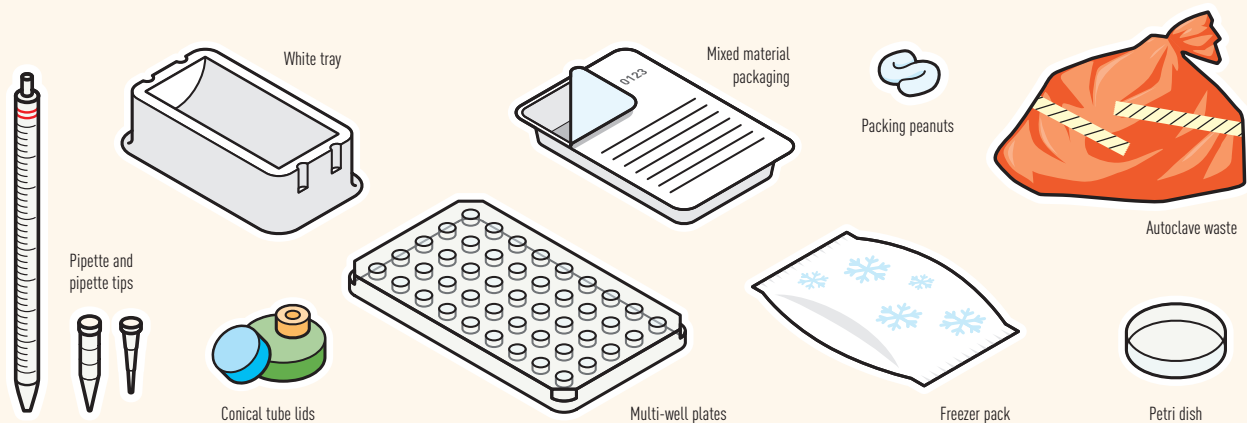

## RECYCLE (CLEANED AND DECONTAMINATED)

Recyclable plastics include: 

Plastics contaminated with chemicals and/or biological waste must be cleaned and decontaminated before being placed in the recycling bin.

## DO NOT RECYCLE

Non-recyclable plastics include: 

Items that are smaller than a fist, made with mixed materials, and any sort of foam plastic are not accepted for recycling.

**⚠ Under no circumstance is plastic contaminated with radioisotope hazards to enter the recycle stream.**
