Research Data Storage Service (RDSS)

Available May 2024

Technical Details Infosheet

The research data storage service provides a powerful data storage solution for researchers at the University of Alberta. This repository provides large volumes for long term storage of research files, including videos, photos, documentation, and specialty file types. Below are the essential details about this new IST service to meet the needs of the University of Alberta research community.

Service Details

- Storage up to 50 TB/P.I. or research group at no charge
- You can add and remove users to each drive
- Accessible via VPN or on the UofA network
- Requests for storage >50 TB via consultation

Access Process

- 3 IT service requests are available: [new service](#), [add/remove users](#), and [increase storage](#)
- Training is available on the RDSS landing page for you to learn how to setup and access the drive
- Check the new [Google Workspace Changes webpage](#)
