

**Disclosure statement:
Timothy Caulfield, Health law Institute, University of Alberta (2023)**

My research is supported by provincial and federal entities. Current funders include Alberta Innovates, the Canadian Institutes of Health Research, Genome Canada, Genome Alberta, Health Canada, the Public Health Agency of Canada, and the Stem Cell Network. A comprehensive list of all funding agencies that have supported my team's work throughout my career is included in my CV.

I do not receive any industry funding for my research or for the support of my students or research team. I do not serve on any industry boards and I do no paid consulting for industry or other entities. I do not have a financial interest in any companies that require disclosure. I work with a speakers' bureau (Speakers' Spotlight), several commercial publishers (e.g., Penguin Random House Canada), and a TV production company (Peacock Alley Entertainment). I also receive modest compensation for some of my other media work, including the publishing of articles in the popular press and hosting radio shows.

I sit on several policy, research and ethics committees (see my CV for a full list), but do not receive compensation for my participation (when required, travel expenses are paid). One of my committees, the WADA Ethics Committee, pays a modest honorarium for face-to-face meetings. Below is a list of presentations from June 2019 – June 2022. See my CV for a full list of my presentations. For some I was compensated (negotiated through Speakers' Spotlight) and for most my travel expenses were covered either by the organizer or a research grant. In 2018, The Garfield Weston Foundation contributed \$5000 to the HLI for administrative support in return for a talk I provided to their board.
