

Department of Ophthalmology and Visual Sciences Research Grant in Precision Medicine

Please include the following in the grant application:

- **Application template**
- **Resume**
- **Two letters of reference**, one of whom must be an **eligible grant holder** (see terms of reference) within the Department of Ophthalmology and Visual Sciences

Upon completion, please save as a PDF with file name 'last name' and 'date of application'

CLOSING DATE FOR APPLICATIONS: FEBRUARY 23RD, 2024

Please use the template below with required sections and their word limits (where applicable) to complete the grant application:

Title: 25 words maximum

Rationale: 200 words maximum

Please provide a paragraph outlining the rationale and supporting literature to support your research question. Please include all appropriate references in the reference section.

Research question/hypothesis:

Specific objectives:

Define the primary and secondary objectives of the research study as applicable.

Methodology overview:

Please describe the methodology of the research study using the following sub-headings.

- Study setting:
- Study subjects:
- Study intervention(s) (if applicable):
- Outcomes and outcome metrics:

- Sample size and rationale (if applicable):
- Data sources and data collection:
- Data management:
- Data analyses:
- Ethics (specify plans for seeking research ethics approval):

Timeline/milestones:

Please provide an estimated start date, the date of completion of each milestone (see below), and the target completion date for the study.

- Ethics:
- Data collection:
- Manuscript preparation:
- Submission for peer review:

Relevance and impact: 100 words maximum

Provide a statement describing the impact of this study as it relates to precision medicine in ophthalmic disease.

Budget:

Please provide a budget (up to \$5000.00) for the funds requested in table format.

References:

10 references maximum
