

Important Information

It is the Department Policy that clinical files are kept for only **3 years after your graduation**. After that time we are able to retrieve information on the clinical courses that you took, but can not provide details on your placement sites, supervisors or placement experiences. This type of information may be required by Licensing Bodies—and will be critical for you if you decide to work somewhere **other than Canada** at some future date.

Our strong recommendation is that you keep your records of your clinical placements.
