

## **Key Points to Remember from NFRF - Transformation Webinar (EN)**

**January 21, 2020**

### **Key Points to Remember:**

#### **Team Composition**

- Minimum of 5 eligible team members (NPI, Co-PIs and Co-Apps)
- Early Career Researchers (ECRs) can be national and international academics
- ECRs do not need to be confirmed at the NOI stage but must be confirmed at the LOI stage
- Participants who do not meet the eligibility criteria will be removed from the application. In the event that the NPI is considered ineligible, the application will be removed from the competition. If removal of ineligible participants from the application results in research teams with fewer than five members, the application will also be removed from the competition.
- Researchers may serve as an NPI or co-principal investigator on only one Transformation grant. A co-applicant can be on multiple applications.

#### **Multidisciplinarity**

- To meet the multidisciplinary pass/fail applications must include fall under the mandate of more than one federal research funding agency (CIHR, NSERC and SSHRC) - at the LOI stage
