

January 2, 2013

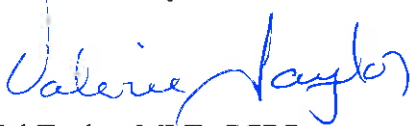

To Whom It May Concern:

It is the policy of Laboratory Services to require TDG training for all staff working in the Clinical Trials Laboratory. All staff are certified for both air and ground transport and are required to recertify every two years. Training is done online through Saf-T-Pak Inc. and signed and dated certificates are issued. These certificates are on display at all times in the Clinical Trials Laboratory in readiness for an inspection.

Please see the attached copy of my TDG certificate as an example of our department's certificates.

Further information, if required, can be obtained by calling Val Taylor, Clinical Trials Coordinator, Laboratory Services at (780) 407-6615.

Yours sincerely,

Val Taylor, MLT, CCRP  
Clinical Trials Coordinator  
Alberta Health Services  
Laboratory Services  
Edmonton and Area
