Speaking of Psychology: Does diversity training work?

<https://www.apa.org/research/action/speaking-of-psychology/diversity-training>

(Episode 120) In our increasingly diverse country, many workplaces have implemented diversity training programs aimed at fostering cohesion, mutual respect and understanding among employees of different backgrounds. Calvin Lai, PhD, an assistant professor of psychology at Washington University in St. Louis, discusses what we can learn from psychological research about whether diversity training works and what makes for effective training.

Picture a Scientist

<https://video.alexanderstreet.com/watch/picture-a-scientist> (1 hr 37 min)

A feature-length documentary film chronicling the groundswell of researchers who are writing a new chapter for women scientists. *A biologist, a chemist and a geologist lead viewers on a journey deep into their own experiences in the sciences, overcoming brutal harassment, institutional discrimination, and years of subtle slights to revolutionize the culture of science. From cramped laboratories to spectacular field sites, we also encounter scientific luminaries who provide new perspectives on how to make science itself more diverse, equitable, and open to all.*

Writing Effective EDI Statements – Dr. Lisa Willis

https://www.youtube.com/watch?v=4L6Slllc1Vo&t=1s&ab_channel=OfficeofResearchandInnovationServicesUWindsor

(2 hrs) Writing effective EDI statements workshop – EDI statements are now required for Tri-Council funding applications but most scientists do not know what goes into one. Additionally, scientists who are used to working with facts and figures cannot adequately write these statements without knowing what the literature says about EDI in science. Join Dr. Lisa Willis from the University of Alberta for a session which will provide researchers with the knowledge to write outstanding EDI statements, all based on the scientific literature. It includes information about the rationale for working with diverse scientific teams, the current numbers for diversity in Canadian STEM, and the controlled studies demonstrating bias in STEM. We will also discuss mechanisms for integrating good EDI principles with the daily lab environment and how to incorporate this information into effective EDI statements.

Academic Ableism and Teaching and Learning in Higher Education – Dr. Jay Timothy Dolmage

https://youtu.be/XQH-8TwQEnI?si=vZDwxM6JMR_ajGKx (1 hr 45 min) Ableism in academia plays out in many aspects of being a Faculty member, student, and/or staff member on campus. As ableism relates to teaching and learning, and as we continue to manage the impacts of the pandemic on higher education, one place where it is being experienced more and more is with increased numbers of students with approved accommodations and exam deferrals. These increases (and the increasing requests for them) are forcing more conversations about how to support students with disabilities. In some cases, these conversations reveal a lack of awareness about the purpose of accommodation and what needs to be done to properly support students. These conversations also reveal assumptions about why students might be seeking accommodations and the implications of providing them. This session will raise awareness about how ableism in academia is present in the way we work to support students, staff, and instructors. It will provide knowledge to help reshape attitudes and beliefs about accommodating students with disabilities so that we can work not just reactively but proactively to improve how we meet our teaching and learning communities' needs.

Surviving Eugenics: A Living Archives on Eugenics in Western Canada production

<https://login.ezproxy.library.ualberta.ca/login?url=https://search.ebscohost.com/login.aspx?direct=true&db=cat03710a&AN=alb.7148907&site=eds-live&scope=site> (44 min) In 1996, Leilani Muir won a landmark legal case against the Canadian

province of Alberta for wrongful sterilization and confinement at the Provincial Training School in Red Deer, an institution for 'mental defectives'. *Surviving Eugenics* traces the history and ongoing significance of eugenics in Canada. Anchored by survivor narratives from Leilani and four other eugenics survivors from Alberta, and drawing on expert testimony from those involved in the case, *Surviving Eugenics* provides a unique insiders' view of eugenics history while raising broader questions about disability and human variation in contemporary North American society.

Indigenous Peoples and Canada

Micro-course (online and self-directed) offered by the U of A Faculty of Native Studies (8-10 hours). A 6 module micro-course that looks at Indigenous historical and contemporary experiences in order to understand the legacy of settler colonialism and affirm Indigenous self-determination. This course covers topics like worldview, resources and relations, governance and treaty, institutionalization, contemporary communities, and resistance and resiliency. Course content will sharpen learners' critical thinking skills to strengthen personal and professional ethics, and will deepen Indigenous/non-Indigenous collaboration through building literacy about Indigenous societies, enhancing intercultural awareness, and obtaining balanced facts about Canadian history and current realities. See link for next offering dates and information on how to register.

Tackling Structural Racism

Micro-course (online and self-directed) offered by the U of A Faculty of Native Studies (8-10 hours). Grounded in the Truth and Reconciliation Commission's Calls to Action, this micro-course introduces key anti-racism concepts that are applied to various sectors (education, social services, and the policing and legal system). By using real world case studies and Indigenous led content to provide learners with Indigenous perspectives and experiences, this micro-course points to successful efforts to tackle issues related to structural racism in Canada. See link for next offering dates and information on how to register.
